

**AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE**

Please enter the following Abstract of the Disclosure in the record:

A coffee machine for preparing coffee, in particular based on coffee pads. Said coffee machine comprises a continuous flow heater which is secured in a housing and which comprises a pipe which is used to guide water. A tubular connection support is disposed on at least one end of the pipe in order to secure the continuous flow heater in an economical and reliable manner and preferably, additional components in the coffee machine. Also, the tubular connection support is connected to securing means in order to secure the continuous flow heater in the housing.
